STEEL SPEAKS THE LANGUAGE OF DESIGN

thanks to the safeguarding of resources and the reduction of any form of improper energy consumption, with close attention to social responsibility.

In particular, CEA promotes the reduction of water consumption and the protection of the environment thanks to the use of dedicated technologies such as flow limiters or water purification systems for kitchen taps.

The company's wide range of products going from bathroom to kitchen, from outdoor to ventilation features a timeless design with simple and linear geometries, a sign of competence, farseeing attitude and in-depth knowledge of the language of design, capable to meet the needs of the market and the requirements of most demanding Clients. www.ceadesign.it

Since 1984 the Italian company CEADDESIGN has been a main player in the field of technological development of design faucets for the bathroom.

The evolution of the company finds its roots in the culture of steel, combining innovation and product quality,

sustainability and production efficiency.

During the Milan Design Week 2023, CEADDESIGN hosted in its showroom in the Design District of Brera the 'ARCHI_GALLERY' exhibition, a mapping of connections that bring together needs, resources and ideas in relation to the architectural space. The event provided 'food for thinking' on how the product relates to the project, becoming a medium among original idea and construction, planning and communication.

Once more, the company confirmed AISI 316L stainless steel as the material of choice for its sustainability values, being steel ecological, durable, hygienic, highly performing and 100% recyclable.

All of CEA's production in Pove del Grappa/Vicenza takes place in compliance with the principles of environmental and energy sustainability, through the use of renewable energy sources and
